João Pedro Teixeira

Full Stack Developer · AI-Assisted Engineering

jteixeira.dev@outlook.com · jteixeira.dev · linkedin.com/in/jpst-dev · github.com/jpst-dev · Lins, Brazil · remote

SUMMARY

Full stack developer with 4+ years building web products, from Design System to API. Strong front-end foundation with Vue.js, Nuxt, React, Next.js and TypeScript, also working on the back end with C#/.NET and REST APIs. I use AI (Claude Code, Cursor) at the core of my workflow to prototype, refactor and generate tests — with human review and a focus on quality, TDD, accessibility and performance.

EXPERIENCE

Junior Front-end Developer · Mercado Eletrônico — Jun 2025 — present
São Paulo, Brazil · remote

- Full stack development: Vue.js/Nuxt interfaces and C#/.NET REST APIs.
- Using AI (coding agents) to speed up development, refactoring and test writing, with human review.
- Evolving the platform's Design System.
- Automated testing with Jest and Cypress.
- Code review, CI and collaboration with product, UX and QA in Scrum.

Front-end Programmer · Mercado Eletrônico — Jul 2022 — Jun 2025
São Paulo, Brazil · remote

- Built scalable product interfaces with Vue.js and Nuxt.js.
- Helped create the Design System from scratch, standardizing components across teams.
- Introduced automated testing (Jest, Cypress) and TDD practices to the team.

IT Apprentice · ViaRondon Concessionária de Rodovia — Dec 2020 — Jun 2022
Lins, Brazil

- IT support, inventory control and requests via SAP (ERP).
- Monitoring and analysis of data and systems.
- Preventive and corrective equipment maintenance.

PROJECTS

DealsGamer · Nuxt 3, Nuxt UI, TypeScript, Vue 3 — dealsgamer.com
PC game deal tracker for Brazilian gamers, powered by IsThereAnyDeal data — live on its own domain, built for great UX and low API usage.

FormatKit · C# / .NET 10, WPF, xUnit, System.CommandLine — jpst-dev.github.io/formatkit
A Windows tool in .NET 10, with a command line and a WPF interface, that rebuilds a computer after a clean install from a JSON profile: drivers, system cleanup, programs and the development environment.

Veritas Fidei · Nuxt 4, Nuxt Content, TypeScript, Tailwind CSS — veritas.jteixeira.dev
A site for learning and defending the Catholic faith: reviewed articles and study tracks, illustrated with sacred art of verified provenance and an accent color that follows the liturgical season.

SKILLS

Front end	Vue.js · Nuxt · TypeScript · JavaScript · Tailwind CSS · Design System · React · Next.js · Pinia
Back end	C# · .NET · REST APIs · Front end ↔ API integration · Node.js
AI-Assisted Engineering	Claude Code · Cursor · Coding agents · AI-assisted refactoring and testing · Human review
Quality, testing & delivery	TDD · Jest · Cypress · Playwright · Code review · CI/CD · Docker · Accessibility · Web performance · Vitest

EDUCATION

Associate Degree in Information Technology
UNIGRANDE · 2025 — 2027 · in progress

Associate Degree in Information Technology
FATEC-SP · 2020 — 2022 · on hold

LANGUAGES

Portuguese — native · English — advanced (C1)

CERTIFICATIONS

- Generative AI Engineer Program 2026: AI in Practice
- Prompt Engineering: ChatGPT, Gemini, Meta AI, Grok and more
- TDC 2024 São Paulo — Web & Front-end, JavaScript & Node.js and UX Design tracks
- TDC 2023 Business — JavaScript and TypeScript track
- TDC 2022 Business — Web / Front-end track
- Web Performance I and II: optimization, Critical Path, HTTP/2 and Resource Hints
- Cypress: E2E test automation
- Complete Web Development 2022
